

World of Warcraft Character Renders

Character render images are generated when a character logs out of World of Warcraft.

The list of available renders is located at the Character Media Summary endpoint:

```
/profile/wow/character/{realm-slug}/{character-name}/character-media
```

For more information, see the Character Media Summary endpoint documentation located on the [World of Warcraft Profile APIs](#) page.

Fallback Images

The character render CDN can serve fallback images for avatars that are requested but do not exist. To request a fallback image if an avatar does not exist, add the **alt** query parameter to the avatar image request.

Type	Format	Example
Query Parameter	?alt=/shadow/avatar/{race-id}-{gender-id}.jpg	?alt=/shadow/avatar/2-1.jpg

 · [API Access](#) [Documentation](#) [Forums](#) [Download Battle.net](#) [Support](#) 

You can request a list of available race IDs from the Playable Races Index endpoint:

```
/data/wow/playable-race/index
```

For more information, see the Playable Races Index endpoint documentation located on the [World of Warcraft Game Data APIs](#) page.

Gender ID

The list of available gender IDs are as follows:

Gender	Gender ID
Male	0
Female	1

Sample Request

A formatted request will look as follows:

```
{avatar-url}?alt=/shadow/avatar/{race-id}-{gender-id}.jpg
```

Where:

- avatar-url** is the URL returned as **avatar_url** from the Character Media Summary endpoint
- race-id** is an ID returned as **races[*].id** from the Playable Races Index endpoint
- gender-id** is one of the gender IDs listed in the previous table

Example: <https://render-us.worldofwarcraft.com/character/tichondrius/00/000000000-avatar.jpg?alt=/shadow/avatar/2-1.jpg>
